TerriTool User Guide

Picture-by-picture instructions for USA field sales teams. Every page matches what you see on your phone.

TerriTool: AI Field Sales · Simple Steps · Real App Screens

What's Inside — One Topic Per Page

Turn to the page number shown. Each section shows the **same icons and buttons** as the mobile app.

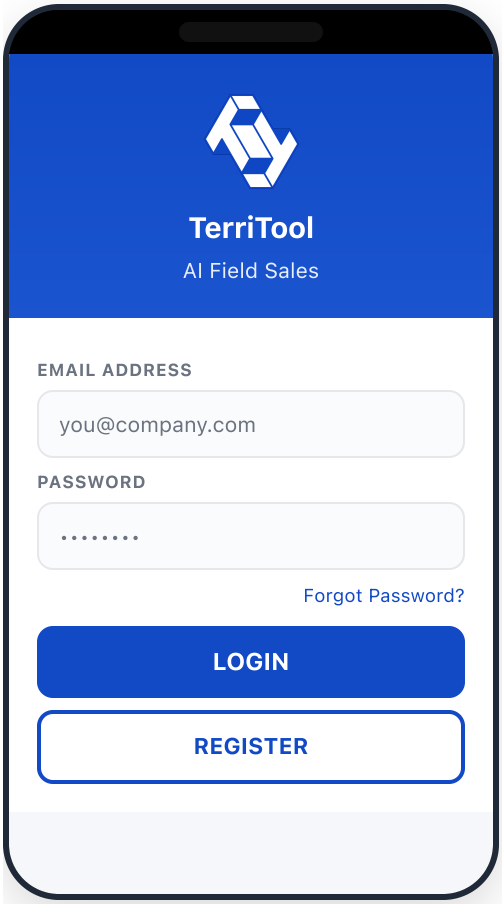

2 — Login & Sign Up	Start here
3 — Bottom Menu (6 Icons)	Always on screen
4 — Home Screen	Your dashboard
5 — AI Find Leads	Find new companies
6 — Routes	Plan driving days
7 — Lists	Group companies
8 — Company Page	Call, map, contacts
9 — Add Activity	Notes & follow-ups
10 — Find Contacts	Get decision-makers
11 — Scan Business Card	AI reads cards
12 — Settings & Credits	Plan & balance
13 — Problems & Fixes	When stuck

Before you start: You need internet (Wi-Fi or cell data). Allow Location when the app asks — maps and routes work better.

Login & Sign Up

WHAT THIS FEATURE DOES

Login opens your saved account so you see your companies, routes, and activities. **Sign Up (Register)** creates a new account and picks a subscription plan. You only do this once — after that, use Login every day.

- **A** Type the email you used when you signed up.
- **B** Type your password (tap the eye icon to show it).
- **C** Tap **LOGIN** — wait a few seconds.
- **D** New user? Tap **REGISTER** instead.

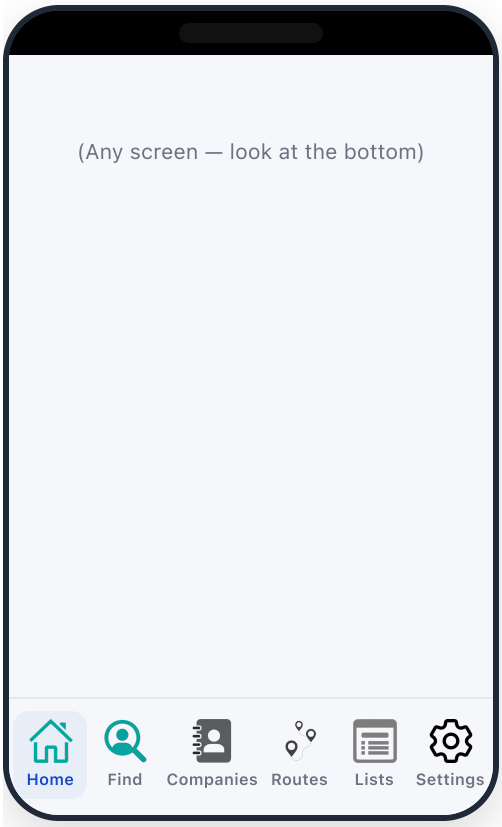

1. Open the TerriTool app on your phone.
2. Enter **Email Address** and **Password** exactly as shown above.
3. Tap the blue **LOGIN** button.
4. You land on **Home** (Page 4). If asked about subscription, follow the on-screen steps.

Forgot password? Tap **Forgot Password?**, enter your email, check your inbox.

Bottom Menu — 6 Icons

WHAT THIS FEATURE DOES

The **bottom bar** is your main navigation. It stays on almost every screen. Tap an icon to jump to that area. The icon you are on gets a **light blue background** — same as the app.

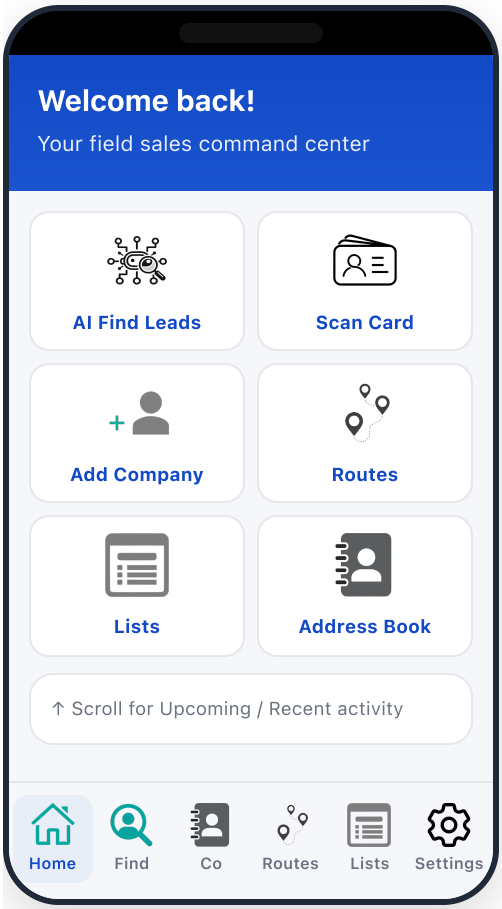

Icon (same as app)	Name	What it does
	Home	Dashboard — shortcuts & activities
	Find Leads	AI search for new companies on map
	Companies	Address Book — all saved companies
	Routes	Your driving routes for field days
	Lists	Custom groups of companies
	Settings	Profile, credits, subscription

Subscription expired? Icons may show a popup — tap **Subscribe** or ask your manager.

Home Screen (Dashboard)

WHAT THIS FEATURE DOES

Home is your daily starting point. The colored tiles are shortcuts to the main tools. Scroll down to see **Upcoming** and **Recent** activities — tap any activity to open that company.

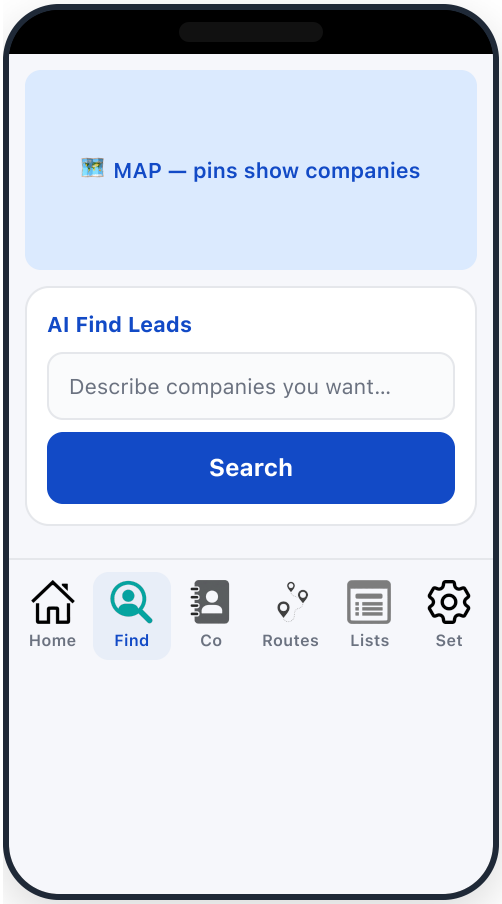

Tile (real icon)	What it does
AI Find Leads	Search for new businesses with AI (uses credits)
Scan Card	Take a photo of a business card — AI saves contact
Add Company	Add one company manually by name/address
Routes	Open your saved driving routes
Lists	Open your company lists
Address Book	See every company in your account

AI Find Leads

WHAT THIS FEATURE DOES

AI Find Leads finds businesses that match what you sell. You search on a **map**, pick companies, and save them to your account. This uses **credits** from your plan. Best workflow: Find leads → Build a Route → Find Contacts at each stop.

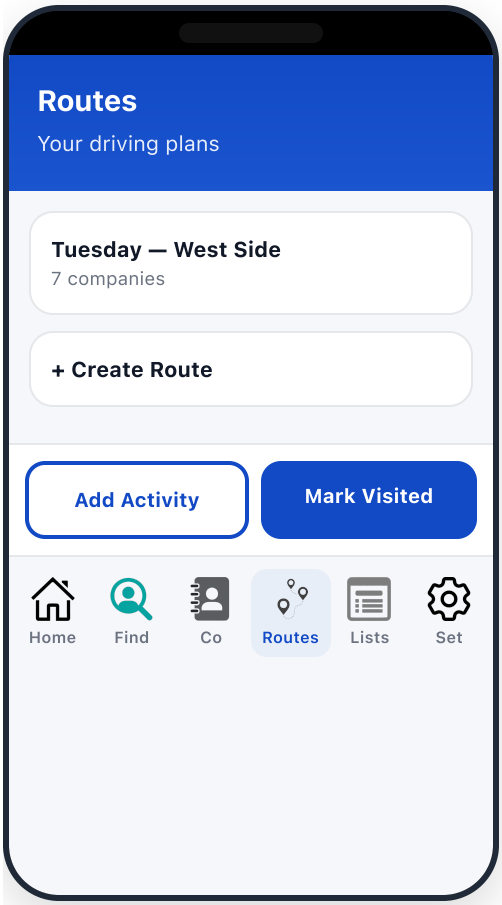

1. Tap **AI Find Leads** (Home tile or bottom icon).
2. Allow **Location** if asked — map centers on you.
3. Type what you want (example: "plumbers in Dallas") and tap **Search**.
4. Tap pins on the map → select companies → **Save**.
5. Next: turn saved companies into a **Route** (Page 6).

"Insufficient credits" — go to Settings (Page 12) to upgrade or ask your manager.

Routes — Plan Your Driving Day

WHAT THIS FEATURE DOES

A **Route** is an ordered list of companies to visit in one trip. TerriTool optimizes the order to save driving time. Use routes when you are in the field: open a stop → **Navigate** → visit → **Mark Visited** → next stop.

Create a route

1. Tap Routes → **Create Route**.
2. Name it (example: "Friday AM").
3. Add companies. Set start/end on map if asked.
4. Tap **Save** / publish when done.

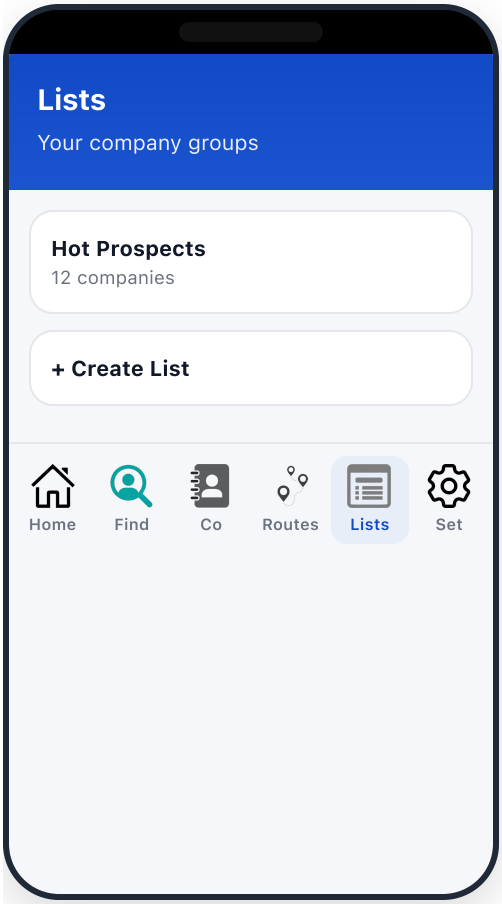

Run your route

1. Open the route → tap first company.
2. Tap **Navigate** → maps open for directions.
3. After the visit tap **Mark Visited**.
4. Use **1/7** arrows at top to go to next company.

Lists — Group Your Companies

WHAT THIS FEATURE DOES

Lists are folders for companies. Example: "Hot Prospects" or "Trade Show Leads." Lists work like routes — open the list and work through companies one by one. Use lists when you want a custom group that is not tied to a map route.

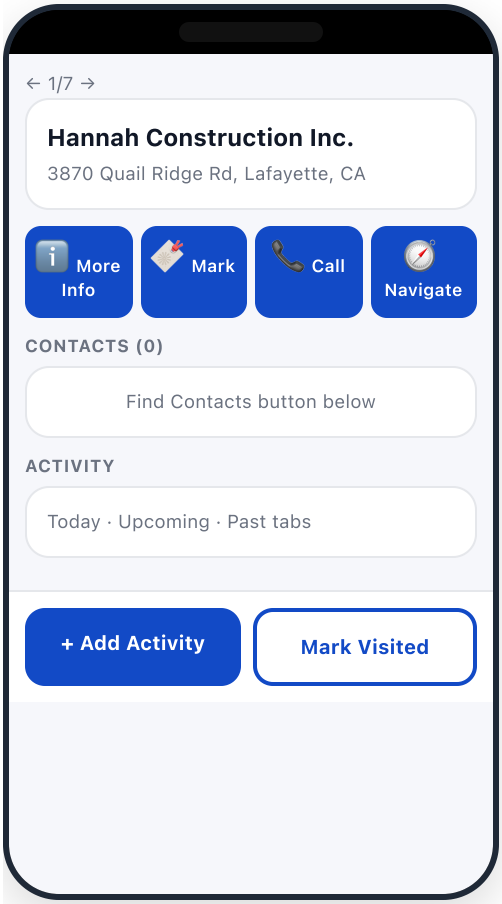

1. Tap **Lists** on bottom menu.
2. Tap **Create List** and type a name.
3. Add companies from your Address Book or from AI Find Leads.
4. Open the list anytime to work through those companies.

Routes vs Lists: Routes = driving order on a map. Lists = grouped companies without map optimization. Many reps use both.

Company Page — Where You Work

WHAT THIS FEATURE DOES

When you tap any company, you see the **Company Page**. This is where you call, get directions, find contacts, log activities, and mark visits. The blue buttons at the top are **quick actions** — same layout as the app.

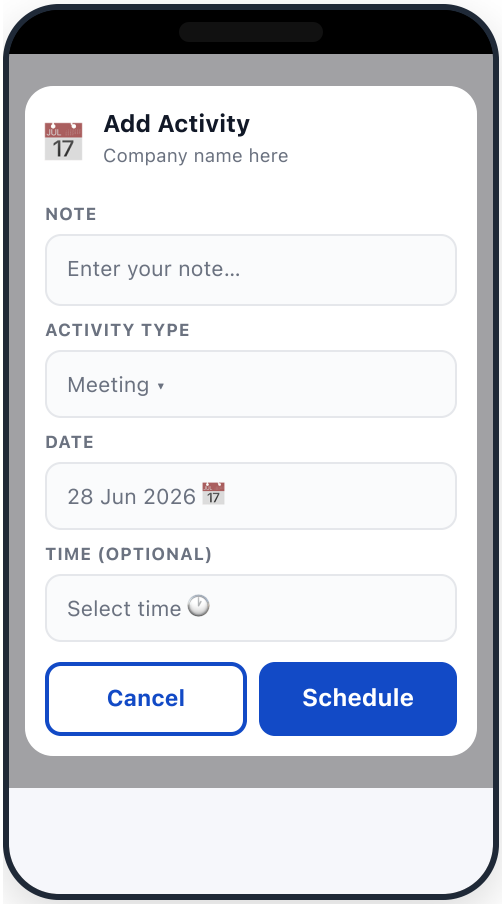

Button	What it does
More Info	Phone, website, hours, company details
Mark	Bookmark this company for quick access
Call	Dials the company phone (gray if no number)
Navigate	Opens Google/Apple Maps for driving directions
+ Add Activity	Log a note, call, visit, or schedule follow-up (Page 9)
Mark Visited	Check off this stop on a route or list
Find Contacts	AI search for people at this company (Page 10)

Add Activity — Notes & Follow-Ups

WHAT THIS FEATURE DOES

Add Activity records what happened at a company (or what you plan to do later). Examples: "Left voicemail," "Met with owner," "Send quote Friday." You pick a **date** (required), **time** (optional), and an **activity type**. Future dates show button **Schedule**; today/past show **Save**.

1. On company page tap **+ Add Activity**.
2. Type a **Note** — what happened or your plan.
3. Pick **Activity type**: Meeting, Call, Visit, Message, Email, Reminder, or Appointment.
4. Tap **Date** → use **< >** arrows to change month → tap a day.
5. **Time (optional)** — tap to set time, or tap **Clear** to skip time.
6. Tap **Save** or **Schedule**.

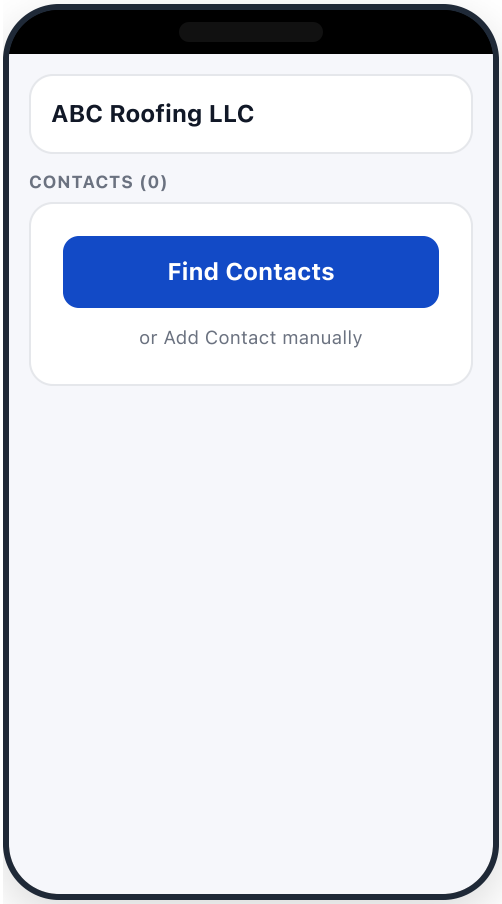

Past date? App asks "Are you sure?" — tap **Continue** to log yesterday's visit.

Edit later: Tap an activity in the list → change fields → **Save** or **Delete**.

Find Contacts

WHAT THIS FEATURE DOES

Find Contacts searches the internet and business databases for decision-makers at a company — names, titles, emails, phone numbers. This uses **credits**. Results appear in the **Contacts** section on the company page.

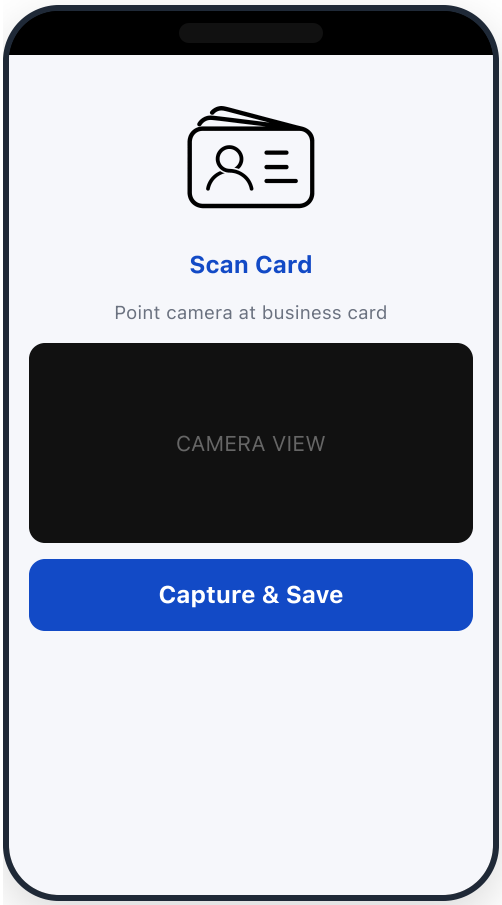

1. Open a **company page**.
2. Scroll to **Contacts**.
3. Tap the blue **Find Contacts** button.
4. Wait — search can take 30–60 seconds.
5. When contacts appear, tap to **Call**, email, or save.

No results? Not every company has public data. Tap **Add Contact** to type someone in manually.

Scan Business Card

WHAT THIS FEATURE DOES

Scan Card uses your phone camera and AI to read a business card. It pulls out the name, company, phone, and email — then saves them to your account. Great after trade shows or networking events.

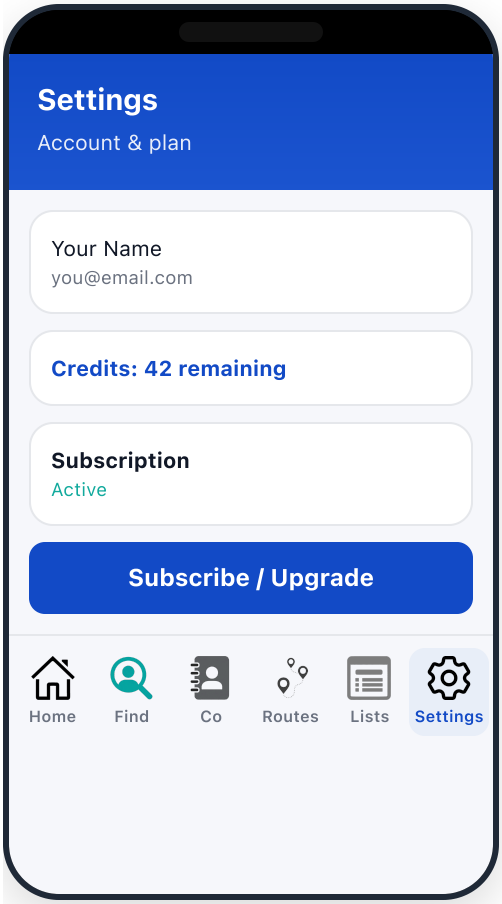

1. From **Home**, tap tile **Scan Card**.
2. Allow **Camera** when asked.
3. Hold the card flat. Good light. Steady hands.
4. Review the info AI read — fix typos.
5. Tap **Save** — contact + company added.

Settings & Credits

WHAT THIS FEATURE DOES

Settings (gear icon) shows your profile, **credit balance**, and **subscription** status. Credits are used for AI Find Leads, Find Contacts, and Scan Card. When credits run out or subscription expires, some features stop until you renew.

Credits are used for:

- AI Find Leads — finding companies
- Find Contacts — getting people at a company
- Scan Card — reading business cards

1. Tap **Settings** (bottom right).
2. Check **Credits** and **Subscription**.
3. Need more? Tap **Subscribe** or ask your manager.

Problems & Fixes

WHAT THIS PAGE IS FOR

Quick answers when something does not work. Try these **before** calling support.

You see this	Do this
No Internet Connection	Turn on Wi-Fi or cell data. Move to better signal. Close app fully and reopen.
Can't log in	Check email + password. Try Forgot Password. Turn off Caps Lock.
Maps won't open	Install Google Maps or Apple Maps. Allow Location for TerriTool.
Insufficient credits	Settings → Subscribe. Or ask manager to add credits.
Subscription expired	Settings → Subscribe. Or renew on territool.com.
Call button is gray	No phone number on file. Tap More Info or Add Contact.
Wrong month on date	In date picker tap **<** or **>** arrows at top.
App frozen	Force-close app. Restart phone. Update app in App Store / Play Store.

Daily checklist — Morning: Open app → check Home → open today's Route → review Upcoming activities.

After each stop: Mark Visited → Add Activity (what happened) → Schedule follow-up if needed.

Still stuck? Email support with: your login email, what screen you were on, what you tapped. Send a screenshot if you can.
